Robbie Robot Shop
Sample Text Menus

CSE 1325-003
Spring 2016 Team Project
Due Thursday, 21 April, 8:00 am

You are free to produce whatever CLI menu structure you like. One possible solution:

```
Main Menu
---------
1 (C)reate
2 (R)eport
3 (S)ave
9 (Q)uit

Create
------
1.1 (O)rder
1.2 (C)ustomer
1.3 (S)ales Associate
1.4 Robot (M)odel
1.5 Robot (C)omponent
1.6 (Q)uit to Main Menu
```

The response to each of the above should be interactive questions to
obtain the data needed to construct the appropriate object.

```
Report
------
2.1 (O)rders
2.2 (C)ustomers
2.3 (S)ales Associates
2.4 (R)obot Models
2.5 Robot (P)arts
2.6 (Q)uit to Main Menu
```

Each row for any list includes the name and xxxNumber of each object,
and then repeatedly prompts for a name to provide full details until
the user enters no data. Then return to Main Menu.

```
Save
----
```
Interactive to obtain the path and filename to save. Loading a saved
shop can be either a command line option or an added menu item.
